ABOUT ICRIER

Established in 1981, the Indian Council for Research on International Economic Relations (ICRIER) is an autonomous, not-for-profit policy think-tank based at India Habitat Centre, New Delhi. It aims to enhance the knowledge base of India's policymaking through analytical research involving multiple stakeholders.

DRUG REGULATION

The Research Program on Drug Regulatory Reforms in India seeks to address key challenges around drug regulation and evolution of pharmaceutical industry in the country. So far, we have produced policy research on administrative structure and functions of drug regulatory authorities, quality and safety, clinical trials and registration of medicines,

CHRONIC DISEASES

Our Research Program on Chronic Diseases in India aims to address challenges regarding the prevention and surveillance of chronic diseases at the primary health level in particular. 21 percent of global premature deaths due to NCDs happen in India, the highest in the world. A nation with global aspirations cannot afford the loss of human capital - and resultant costs for households and the economy - at this scale.
